

Save You From

This life wasn't cut for you
Confused and broken away
The fight has lost you
they say its hard coming back

With you
Even when the nights are darker
And the stars fall so far away
I believe in you, even tonight
I will save you from...

You spend your time just trying to reason with yourself
I know the feeling's got you stalling over fears
that were never real
Being normal's just not something that you can agree
You see the truths then drink the juice and all the lies
A silent tragedy

With you
Even when the nights are darker
And the stars fall so far away
I believe in you, even tonight
I will save you from...

Whatever it is
I wanna save you
Let me guide you home
Grab my hand and don't let go
I wanna save you
From
