

# Cold Dark Night

Walking down the boulevard  
His eyes full of tears and an empty heart  
Thinking bout the losing fight  
Out there waiting on a cold dark night

She doesn't even want to try  
Another day, another way, they're all silly lies  
An empty heart will slowly die  
Out there fading on a cold dark night

Shadows in the distance on a route to collide  
The only way they'd ever know is to open up their eyes  
NO "Come here baby and let's get high"  
Out there blinded on a cold dark night

There might be  
Something in her eyes, to free me  
But tonight  
Out there hazy on a cold dark night

They gaze upon each others' eyes.....

Then we danced all night long  
To a happier song  
Walked hand in hand  
On a night with no end  
In a dreamland we play  
As the night fades away  
Why dont we just try and stay

There might be  
Something in her eyes, to free me  
But tonight  
Out there hazy on a cold dark night  
oh I said out there hazy on a cold dark night
