

I Am The Wind (Come Dance With Me)

Under the star light
I can fly so high
Run my fingers through the trees
Dancing around the night
on an endless flight
far beyond the road I see

When I close my eyes with a gentle smile
I know that I am really free
With no wrong or right
and no sound or sight
We are all just energy...
energy...energy

Oh yea, come and dance with me
the higher that you dance you'll see
we are just energy

And for as far as I can see
In the heavens where we find some peace
Where we are just really free
Fly and come dance with me

Here in the sunshine on a circle climb
over the clouds we rise
with no yours or mine
we are all one energy...
energy...energy

Oh yea, won't you fly with me
the higher that you dance you'll see
we're all just energy

And for as far as I can see
In the heavens where we find some peace
Where we are just really free
Fly and come dance with me

Oh Oh Oh
Oh Oh Oh Oh Oh
