

Shine

HEY

Here we are
This light that we possess
is for us to share

HEY

Don't be afraid
Just tell me that you're happy
and I'll fade away

Find what's in your heart
and seize the day
It's there inside you
don't let fear force you to hide away
The stars have now aligned
It's time for you to shine

STAY

no, don't you stay here
I can't sit here
Watch as you start to dim
I won't let you fade away

Find what's in your heart
and seize the day
now it's time to
find you something you love and run away
illuminate your mind
yea and you will find
The stars have now aligned
It's time for you to shine

Can you feel
the fire burning deep now

Yea I want you to get your shine on
I want you to get your shine on
I won't leave until you get away
